EXAMINER'S COMMENT

1. An Applicant's requested Pre-Appeal Brief Conference was conducted on September 26, 2005. Overall, claims 5 and 8 are pending in this application.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

As determined during the Pre-Appeal Brief Conference, the inverter (5) in Kojima is located between the generator (3) and the battery (6) and functions to connect or disconnect the generator from the shafts of the engine (1) and the electric motor (2). Therefore, Kojima does not require a clutch between the generator and the shafts to perform the connection and disconnection of the transmission of the power between the generator and the engine and electric motor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of two patents: Suzuki (U.S. Patent 6,810,977) and Suzuki (U.S. Patent 6,892,541) further disclose a state of the art.

Art Unit: 3748
